

Shiezza Lauron

FULLSTACK DEVELOPER

Profile

Hi! I'm Shiezza, a Full-Stack Developer with 5+ years of experience specializing in React Native and TypeScript mobile development. I architect end-to-end solutions spanning responsive UI components, offline-capable state management with Zustand/TanStack Query, encrypted local storage, and SQL Server database optimization.

My expertise are translating mockups and requirements into production-grade, cross-platform applications with seamless API integration and real-time monitoring. I deliver innovative and high-performance solutions that involve technical adaptability, collaboration with AI and problem-solving.

Employment History

Full-Stack Mobile Developer - Facilitron - Freelance

MAY 2025 — PRESENT

Mobile Maintenance Management Application

Technical Environment: React Native • TypeScript • Expo • Zustand • TanStack Query • React Navigation • SQL Server • SQLite • Axios • React Native Paper • EAS • Datadog • Git

Contributions: Architected and developed enterprise React Native application with offline-first architecture, implementing end-to-end features from TypeScript UI components to SQL Server stored procedures. Managed state with Zustand/TanStack Query, built encrypted local data persistence, and integrated Datadog monitoring across iOS/Android platforms.

Front End Developer - EdCafe - Freelance

FEBRUARY 2025 — MAY 2025

Developed interactive web apps and optimized front and back-end architecture. Building AI products to enhance the user experience.

Front End Developer - CSA 360 Software - Freelance

JULY 2022 — FEBRUARY 2025

The all-in-one security software solution for event and venue operations. I implemented new features and resolved complex issues in mobile and desktop applications, improving user experience, reliability, and performance.

Front End Mobile Developer - Lyra - Freelance

NOVEMBER 2024 — JANUARY 2025

A mobile app designed specifically for caregivers. I helped improved app stability and user satisfaction through UI/UX enhancements and bug fixes

Front End Mobile Developer - Baptist Faith - Freelance

NOVEMBER 2024 — PRESENT(ON CALL)

A mobile app of over 10,000 video and audio files of Bible based material broken down into three sections, music, bible and preaching.
